

Ark^{nt}® Building Tape Solutions

Foil Scrim Tape

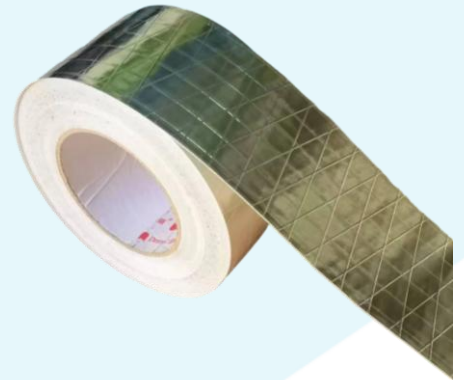

Foil Scrim Tape is a high-strength aluminum foil tape reinforced with fiberglass scrim and coated with a strong pressure-sensitive adhesive.

- High tensile strength (reinforced with fiberglass scrim, anti-tear)
- Moisture & fire resistant (blocks water vapor, ensures system durability)
- HVAC systems: Seal joints of air ducts and insulation materials
- Building insulation: Works with aluminum foil facings to boost moisture & heat resistance
- Insulation for refrigerators, freezers, water heaters, etc.
- Industrial use: Protect pipes, equipment and machinery from moisture, corrosion and heat

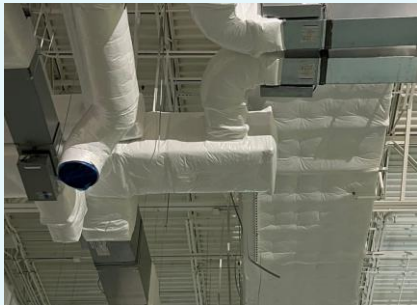

Size: 3 in. x 150ft. (7.62cm x 45.72m)
4 in X 150 ft. (10.16 cm x 45.72m)

Customizable sizes

PSK (Polypropylene Scrim Kraft) Tape

High-performance insulation tape made from Polypropylene film laminated with Kraft paper and reinforced with fiberglass scrim. It is coated with a strong, pressure-sensitive adhesive for long-term bonding.

Key Features

- Reinforced strength: Fiberglass scrim for tear resistance & durability
- Sealing PSK insulation facings in HVAC ductwork
- Vapor barrier for pipe/duct insulation systems
- Joining & repairing laminated insulation materials

Aesthetic finish for building insulation

Size: 3 in. x 150ft. (7.62cm x 45.72m)
4 in X 150 ft. (10.16 cm x 45.72m)

Customizable sizes
